

NORTH SANTIAM WATERSHED COUNCIL

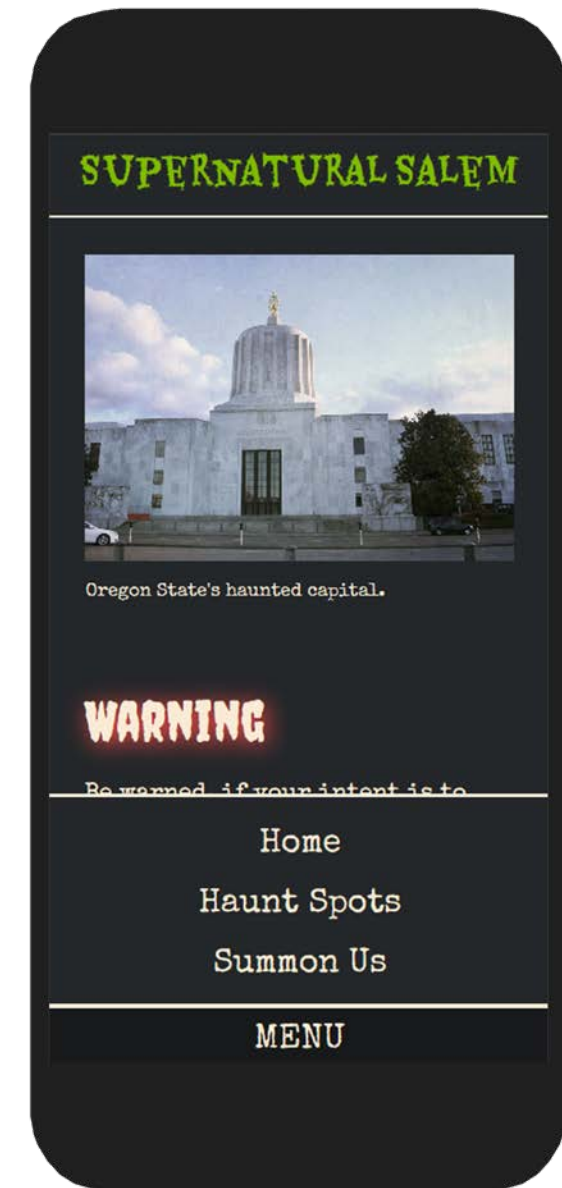

I had the opportunity to redesign the logo for the Oregon North Santiam Watershed Council. The goal was to create a symbol that represents community working with nature.

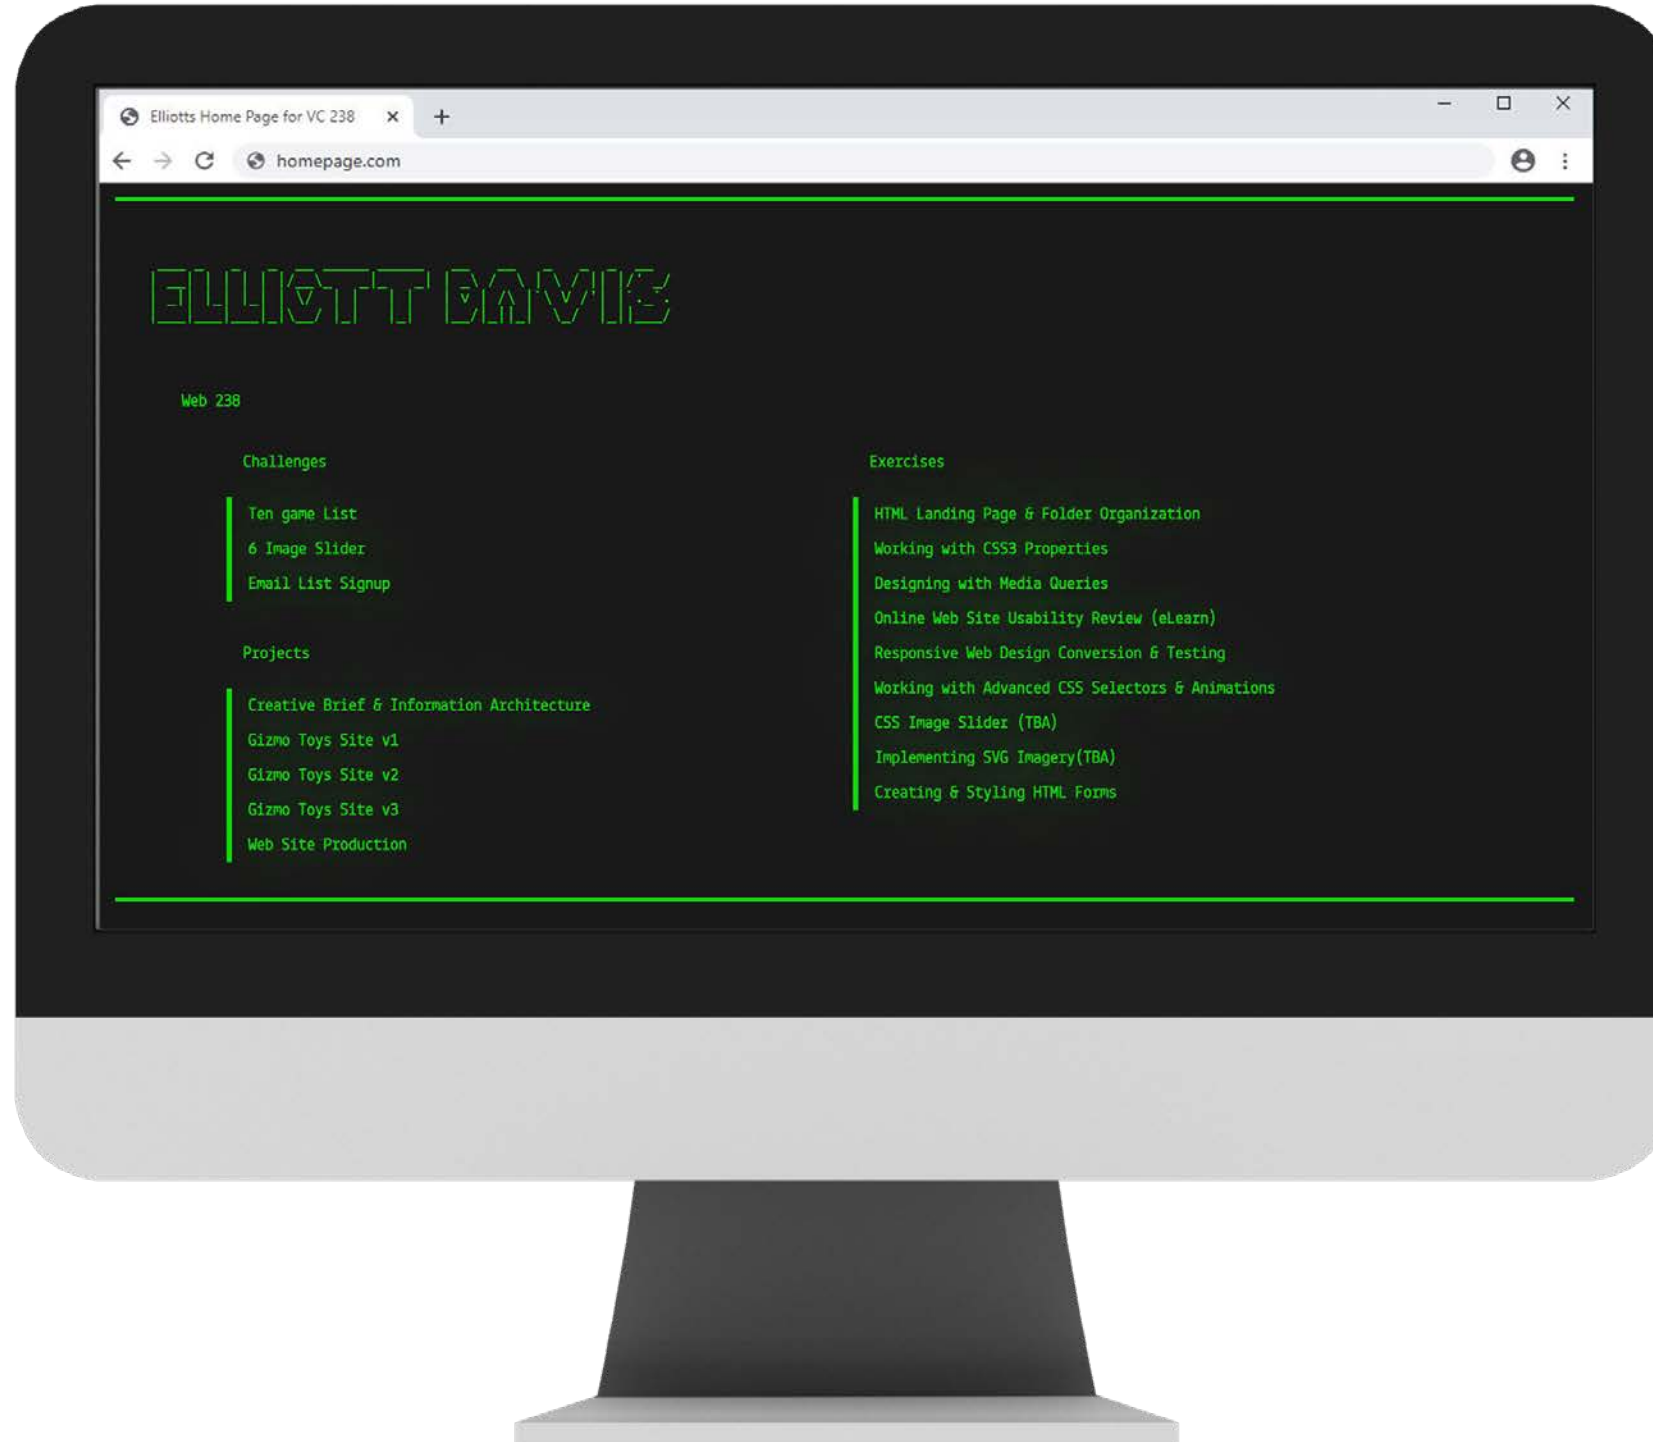

North Santiam Watershed Council Logo

 In this class project the goal was to replicate vintage travel posters for a fantasy world. This poster was based off a world called Pandora from the Borderlands video game franchise.

 Supernatural Salem was a group project to build a website that highlighted several famous haunted locations in Salem, Oregon. While many aspects of development were a joint effort, I designed the easily-reachable mobile navigation menu.

 This was a landing page for a web design class for hosting all my projects. It was inspired by the glowing green text and dark background style early computer operating systems.

 This design creates a fresh and clean website with an inviting slideshow and simple layout for ease of use. Many aspects of the website are interactive giving the user a photo gallery, a map, and a way to sign up for expeditions.

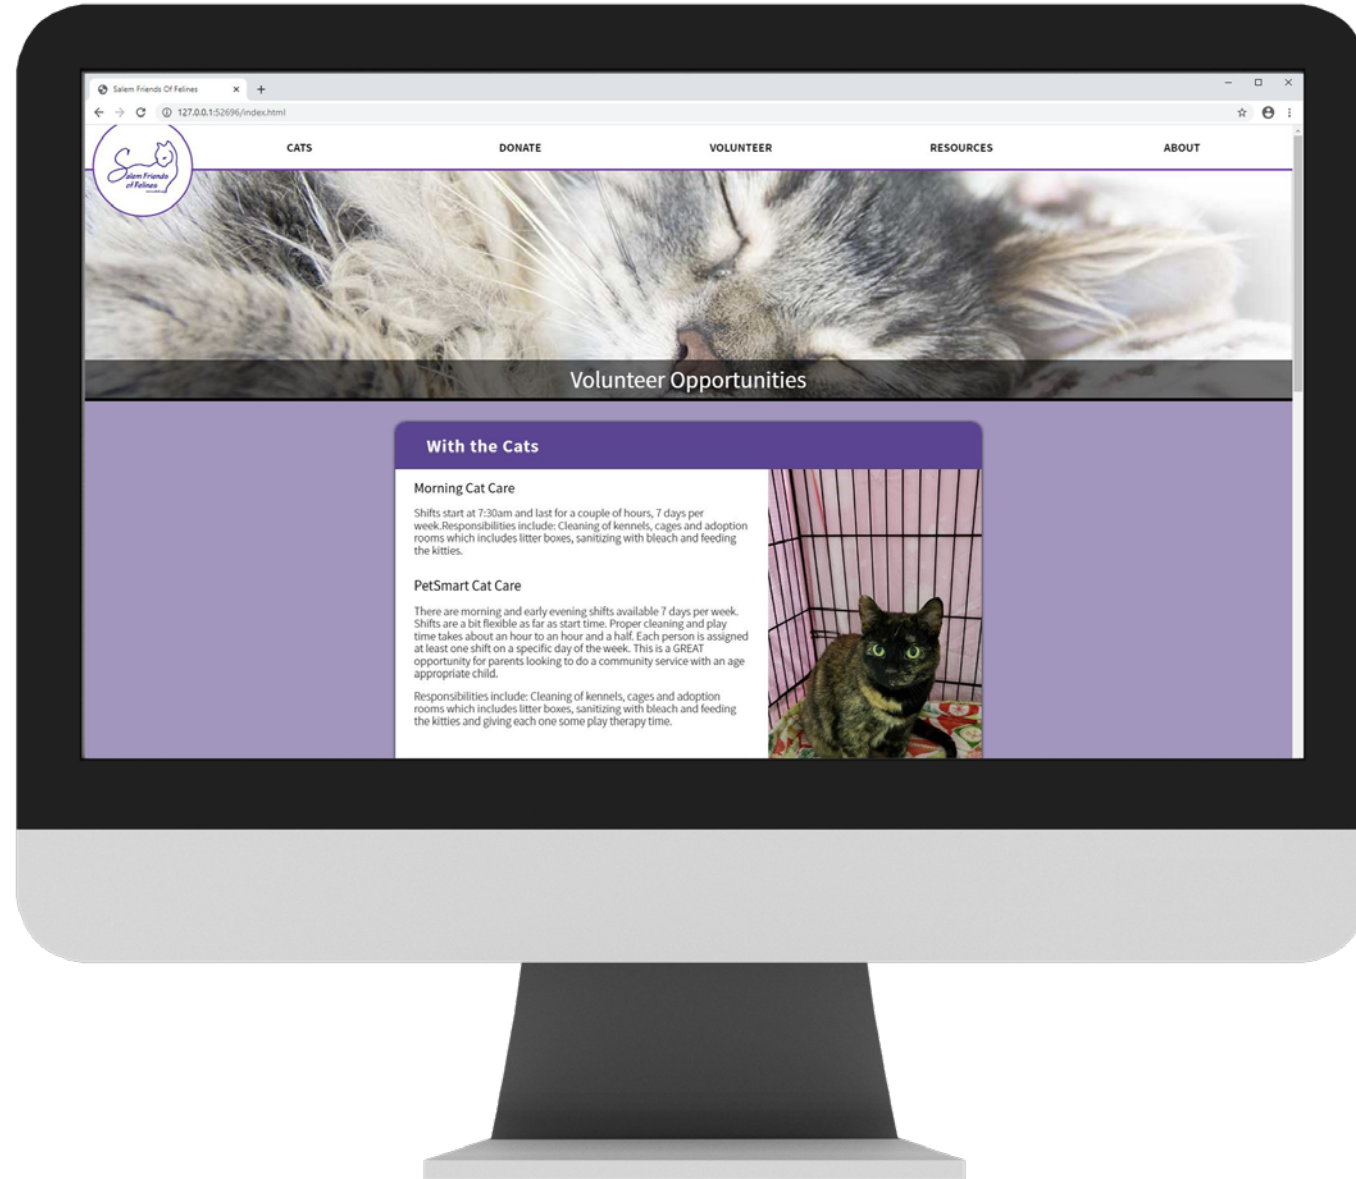

Northwest Expeditions

 Nature's Kick is a Salem-based honey business. I developed their iconic Bee mascot into 3D for advertising opportunities.

Nature's Kick Happy Bee 3D Mascot

 This redesign of Salem Friends of Felines was a project to refresh the layout and usability to a more friendly and visually pleasing interface. Utilizing the client's original source content and color choices, I focused on a simple softly colored layout.

 I created my own mockups using a 3d program called Lightwave3d. Expanding my skills into new mediums has allowed more freedom to design and create my own assets for mockups and displays.

Custom 3d mockups
